New Leads tab in search results

The leads tab now shows you matched contacts from your search (25 per page, with pagination to view more contacts). Here you are able to view data points for each contact (email, LinkedIn url & phone number).

	First Name	Last Name	Job Title	Contact Info	Company Name	Company URL	Site

NetFinder updates

By using the arrow to expand a section, you can now directly view and/or copy (using the icon) this information into an external tool, such as Outlook.

Within the Leads tab, you also have the option to choose contacts for export (or export all).

When you opt to select specific contacts (as illustrated below), a new pillbox will appear, displaying the ContactIDs of the selected contacts. You can then re-apply the search and save/export, ensuring that only the selected contacts with ticks will be saved/exported.

Once you have re-run your search for only the selected contacts, these will appear first in the results page. *Example of pillbox for selected contacts (numbers represent ContactIDs).*
